

KEEP ON TRUCKIN' WITH XERO AND ICOS LIVE

Xero and ICOS LIVE's goal is to keep you and your truck on the road and in business. We want you to keep on truckin' and improve the bottom line of your business.

Accounting can be complex for truckies – trucks to track, taxes to pay and all those reports to compile for your lenders. So we've made it easy, by integrating two smart systems into one.

All you need to do, to make more money, is sign up to our solutions to help you capture dockets, invoice them, track your jobs, and reduce revenue leakage that is costing you money.

LESS DATA ENTRY

With Xero and ICOS LIVE the systems "talk to each other" so any data you enter into ICOS LIVE either manually or electronically is automatically uploaded into Xero for invoicing without you having to re-key it.

Between ICOS LIVE and Xero, invoices are calculated to even include the Fuel Adjustment Factor (FAF) for you.

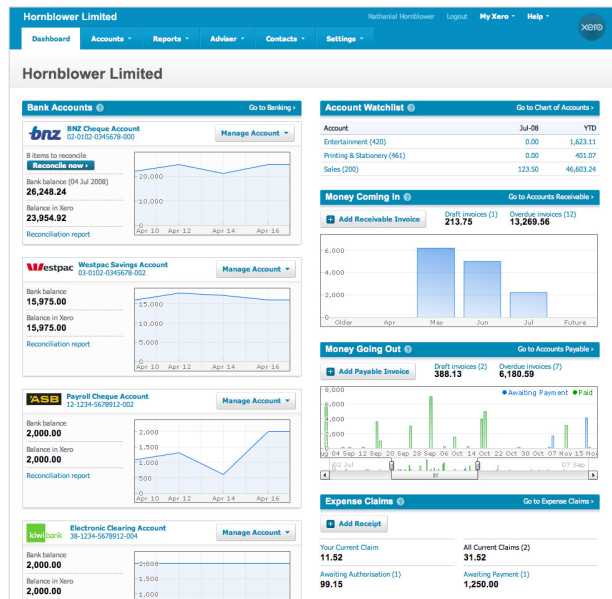

GET A HAND

Invite your bookkeeper, accountant, wife, business partner, or anyone into Xero as well at no extra cost. This means that if you get stuck and need a hand, they can logon to Xero – no matter where in the world they are – and see where you have gone wrong and correct it. Too easy.

WORK FEWER HOURS

With Xero and ICOS LIVE you'll be able to better track your money and stop the unnecessary outflow of cash. And guess what? We reckon you'll probably be able to take a holiday because you'll be working less hours.

Sign up to Xero and ICOS LIVE and you will see a difference in your bottom line. End of story.

The Xero dashboard gives you a real-time view of your business at a glance, providing a snapshot of:

- all your bank accounts,
- your account watchlist,
- money coming in and going out,
- your expense claims.

Contact ICOS LIVE for a demo by calling Kathy Ross on **09 634 0882**, or emailing sales@icos.net.nz.

To find out more about Xero go to www.xero.com or phone **0800 GET XERO** (0800 438 9376).

The world's easiest accounting system
